### Jury Views the City Island; Grand Jury May Remain in Session All of This Week

The jury in the case of F. W. Pope against the City of Daytona, today viewed what is known as the City Island in an effort to solve the pending litigation which has occupied the time of the circuit court in session at Daytona since last Friday morning.

What is commonly known today as the City Island, was originally a tract of land of about 2 1/2 acres. This property was originally surveyed, for the government, by the late D. D. Rogers, in 1877. It is located in two sections, 5 and 17. The section line between section 5 and section 17 divided the island into two lots, and the original survey shows two and a fraction acres lying north of the section line and 41.99 of an acre lying south of this line. For the purpose of identification, that property lying north of this section line was designated Lot 2 in section 5, Township 15, South of Range 33, east, and that part lying south was designated Lot 5 in section 17, Township 15, south, range 33, east.

After the survey, in 1881, Henry P. Bryan, a one time resident of Volusia county, obtained his final receipt from the U. S. government, showing that he had homesteaded this tract of land, and the entire tract was thus obtained by him. The patent from the government did not issue to Mr. Bryan until 1882. In 1882, just prior to the issuance of the patent, Henry P. Bryan and wife, Rebecca Bryan, conveyed this tract of land to William Jackson.

Under deed from Jackson the St. Johns & Halifax River Railway company, (now the F. E. C. Ry.), obtained the right to extend its tracks over the land, and the railroad at one time (1887) ran over this property. The F. E. C. Ry., several years ago released its interest in that part of the property lying in Section 17 to Mrs. William Jackson. The Halifax Bridge company (South Bridge) also obtained from William Jackson a right-of-way over the part of the property now occupied by them.

The City of Daytona obtained title to Lot 2 in section 5, both from the F. E. C. Ry. and a Sheriff's deed, and, not knowing that the island consisted of any more property than this, the people have, generally, called the entire tract City Island.

This property has been known by several names. It was at first called Mill Island, because of the fact that a saw mill was, at one time, located there. The mill was destroyed by an explosion, at which time four or five men were killed. It was later known as Railroad Island, and subsequently as Jackson's Island; although none of these names were official, and there is no plat of record in the county giving the property any such official designation.

About 15 years ago what is now known as the Public Library, was built on this property. James N. Gamble, of Proctor & Gamble Co. soap manufacturers, furnished the money with which to erect the building. About ten years ago, a causeway was built from Beach street to the island for the benefit of patrons of the library. Mr. Gamble also furnished the money for this, and the late Laurence Thompson had charge of the work for Mr. Gamble.

In April, 1917, William Jackson conveyed his interest in the property to F. W. Pope, and Mr. Pope has never claimed any part of the property except that part lying in Section 17, and known as Lot 5.

The grand jury is still in session and it is said that the body may remain in session all this week.

### New 18-Hole Golf Course to be Built by F. E. C. Hotel Co. at Ormond Beach Soon

That the Florida East Coast Hotel company, owners of the Hotel Ormond and golf course in connection, contemplate the building of a second 18-hole golf course immediately north of the present links on Ormond Beach, is the information brought to Daytona today by J. M. Childs, president of the Kennelworth Inn, at Asheville, and interested with Dr. E. W. Groves in the development of a large tract north of Ormond Beach, as a winter resort, the community to be settled by Asheville residents.

Mr. Childs states that the move which they are making at this time, toward development of the property and erection of homes has been rushed at this time, because of the plan of the F. E. C. to build a new golf course on their Ormond property, supposed to be this winter.

Engineer C. M. Rogers, of Daytona some time ago drew plans for a second course, and it is intended that the golf links will be laid out according to these plans. The hotel company has held an option on considerable land immediately north of the present course for the past fifteen years, and is just at this time taking it up. The new course will run close to the river, on the west side, facing the John Anderson highway.

It is the intention of the Ormond Hotel management to cater more than in former years, to golf enthusiasts and it is believed that this will make necessary two courses on their property. Already plans are underway for a number of tournaments for the Ormond course for the season of 1921.

The greater portion of the land to include the second course has been cleared recently, and will soon be ready for preliminary work for the construction of the course.

## EUROPAPHOBES

Now for the Europaphobes. They live that part of the American populace which wants to forget Europe is on the earth. They believe all rewards hereafter will go to America and all punishment to Europe. They wish America to keep pure by isolating herself from the rest of humanity. The shrill sanctimony of their chorus is never at rest.

The Europaphobes are highly dangerous to the peace and prosperity of the United States. They believe the way to security is to turn your back on a perilous situation. If the Europaphobes keep America aloof from Europe, another world war will come, for only the United States is capable of heading it off. Then, after America is dragged into the conflict, thru a persistent disregard of neutral rights, the Europaphobes will say it was an act of fate and couldn't be helped.

No such thing. If America, without selfish purposes, interests herself in European affairs, there will not be another world war. Therefore, national self-protection is now the major duty of the American diplomatic corps. The Europaphobes would keep the Department of State and the American nation at large suspiciously repellant toward Europe.

Not in that way can America learn of the war plots and conspiracies going on beneath the European surface. The Europaphobes disbelieve in plots until after the explosion. They must not be allowed to endanger America by this attitude. It is necessary for America to keep on terms of intimacy with Europe to guarantee peace in the western hemisphere.

## CONTEMPT OF COURTS

When H. F. Graham, former governor of Vermont, was sentenced in the Supreme Court of that state after having been convicted of embezzling state funds, he appealed to Governor Clement for an unconditional pardon.

And the very day the embarras was sentenced by the highest court in the state he was given his unconditional pardon!

That is how the chief executive of an American commonwealth holds the highest court of his state in contempt. If that isn't real contempt of courts, what is?

Sentenced to prison for five years, pardoned immediately by the governor, before one foot had been set within penitentiary bounds—can you wonder that other convicted criminals of Vermont may entertain a decided feeling of contempt for the courts? If non-criminal citizens of that state escape that feeling in respect to their courts, it can only be because they have too great a contempt for the governor.

A day at the polls hasn't spoiled women for housework.

When two sons with but a single thought go to the polls the result is not two votes that count as none.

## LATEST NEWS OFF THE TICKET FROM NEW YORK MARKET

(Dow Jones Service.)

A ship inspector told the congressional committee last night, that he pushed rivets with his fingers, out of holes in vessels made for war.

The New York Central has laid off 5,000 men, while unemployment is growing steadily in New England.

The British Soviet trade treaty is expected in Washington within the next two weeks.

The Standard Oil company has contracted for 140,000,000 barrels of gasoline from the Mexican Petroleum company in 1921.

Radical cuts in appropriations made before election will cause congress to face a heavy deficit.

Thompson & McKinnon's stock letter today says: "You would use a powerful microscope to discover anything bullish, and this very fact means that the market is getting in good condition. We are establishing a foundation in the customary manner by digging deep. And liquidation by tired holders and accumulations by permanent investors will make the foundation strong. It is perfectly natural for a lot of unfavorable things to happen now, shutting down some mines, manufacturing plants going on a short time, railroads discharging men. For a long while, a union card was of greater value than a stockholder's certificate, and this is being changed. This is a good time to brace up in a little while, we will be on the smooth road again. This is the time for the investor to accumulate stocks."

## Heavier Rainfall So Far This Year of Any on Record

Rainfall in Dayton, during the past ten and a half months, has exceeded the rainfall in this city for any year on record, according to figures compiled by J. G. Brown, who maintains a complete record of every rainfall in this vicinity.

This record runs over a course of more than 10 years. In 1915, Mr. Brown states, the rainfall reached a fraction over 66 inches, which at that time constituted a record in the history of rainfall in Dayton. This figure has now been exceeded, with a month and a half yet to go, which means that 1920 will present new figures for rainfall in Dayton.

After two days of almost continuous rain, the weather man promises no let-up for the present. The rainfall at this time is general all over the South, while in the middle states and the north, heavy snow storms and inclement weather is reported.

## SPECIAL BOOK ON CANCER SITUATION BEING DISTRIBUTED

JACKSONVILLE, Nov. 16—A specially prepared booklet entitled "What Everyone Should Know About Cancer," is in the hands of the state board of health and is being reprinted for the purpose of placing copies with every physician and health worker in the state of Florida. The booklet contains valuable and interesting information on cancer and is written in non-technical terms that can be easily understood by the layman.

It was prepared in 1919 by a special committee of the American cancer society for the control of cancer, consisting of Dr. Francis Carter Wood, of New York City, chairman; Dr. James E. Gaylord, Buffalo, N. Y.; Dr. H. K. Hyzer, Boston, Mass.; and Dr. Frederick Hoffman, Newark, N. J. The state board of health is distributing this booklet throughout the state because of the urgent need of the educating of the public into giving immediate and intelligent attention to all known danger signals. The firm hold it gains on its victims before causing any discomfort or showing obvious symptoms make it one of the most treacherous of diseases. The danger lies in the deep seated grip it has on a person before proper medical attention is sought. For this reason it is most important that people in general know some of the essential facts about cancer and its beginning so that a competent physician can be consulted before any actual pain is felt.

Some of the interesting figures in the booklet show that during the two years and a half that the United States was engaged in the great war about 10,000 soldiers were killed or died of disease. During the same period of time cancer caused the death of 150,000 people in this country. Florida vital statistics show that nearly 1,600 of this number were citizens of this state.
